

JIVORA

Product Requirements & Discussion Document

Version: 0.1

Prepared By: Anjali Maurya, Archana, Ritik Shukla

Project Overview

Jivora aims to become a global B2B trade ecosystem connecting buyers, suppliers, manufacturers, exporters, wholesalers and businesses on one platform. The goal is to simplify international trade while providing an engaging user experience.

Target Market

Primary markets: United Kingdom (UK) and Europe.

Target Users

Buyer
Supplier
Manufacturer
Exporter
Admin

Each role should have a separate dashboard and interface.

Platform Goal

- Connect buyers with verified suppliers.
- Help suppliers discover buyers.
- Support international trade.
- Build a complete business ecosystem instead of a traditional e-commerce website.

Initial MVP Scale

- 500 Vendors/Suppliers
- 3,000–4,000 Products
- 10 Categories
- Initial traffic target: 10,000 users
(Subject to confirmation)

Core Modules

Buyer Module

- Product Search
- Supplier Discovery
- Dashboard

Supplier Module

- Registration
- Product Management
- Buyer Inquiries

Manufacturer & Exporter Modules

- Separate interfaces (TBD)

Admin Module

- User Management
- Product Approval
- Analytics

Homepage Requirements

Interactive About, Services, Why Choose Us, Strong CTAs, Responsive UI, Vibrant branding (Sky Blue discussed).

Engagement & User Experience

Ideas discussed include loyalty points, rewards, unlock levels, mileage system and interactive experiences. One concept discussed was adding a small interaction before redirecting users to social media to improve engagement. Final implementation is yet to be decided.

Seller Onboarding

Easy registration, business profile, verification, product upload and dashboard.

Buyer Acquisition

Jivora should help suppliers connect with genuine buyers, not just onboard suppliers.

Marketplace

Product listings, categories, supplier profiles, search, filters and product details.

Payment Integration

Online payment support and international payment options (under discussion).

Documentation Support

Trade, export and business documentation support (to be finalized).

Logistics Support

Logistics assistance/integration (to be finalized).

Branding

Modern, premium, international, user-friendly and vibrant.

UI & UX Direction

Role-based interfaces:

Buyer Interface

Supplier Interface

Admin Interface

Competitor Research

Amazon, eBay, Etsy, Wayfair, ASOS, Zalando, Next, Marks & Spencer, John Lewis, Argos, B&Q, Temu, AliExpress, ManoMano and Not On The High Street.

Research areas: Business Model, UI/UX, Categories, Search, Seller Journey, Customer Journey, Payments, Delivery, Loyalty, Marketing, Strengths and Opportunities.

Open Questions

Difference between supplier/vendor/manufacturer/exporter, MVP scope, verification process, logistics, payment flow, loyalty system, buyer journey, seller journey and engagement features.

Action Items

Complete competitor research, finalize MVP, prepare user flows, design role-based dashboards, finalize architecture and clarify pending requirements.

Version History

Version 0.1 - Initial document prepared from the vision document, client meeting discussions and handwritten notes.
